Our ENVisionIT® real-time location system uses ultra wideband (UWB) technology to provide accuracy to within +/- one foot.

Be Connected Anywhere You Go
- Have full RTLS software access on mobile devices
- Receive and acknowledge alarm and alert notifications on your mobile device
- Works with iOS and Android OS systems
- Notifications automatically clear on all devices after event is acknowledged

Find Anyone or Anything at Any Time
- Display the real-time locations of assets and people within +/- 1 ft
- Alerts and Alarms include picture push function
- Flexible, easy-to-use search
- Search by:
  - Location
  - Type of role or name
  - Serial number or asset ID
  - Type of device
- Search results are displayed as real-time maps or lists

Increase Staff Safety
- Staff safety tags feature a duress button that trigger an alarm in 2-3 seconds
- Staff safety tags can be worn on a lanyard or belt clip or adhered to an existing badge

Next Gen Real-Time Location
- Enhanced granularity allowing for accuracy to within +/- 1 ft
- Faster system implementation using state of the art predictive system
- Information can be backhauled using wired Power over Ethernet
- Locate anywhere, any time

Improve Staff Workflow
- Help enhance workflow with location based information
- Aid in automation of reports on patient care
- Know when and where staff are spending their time

Made in the USA
Prevent Patient Wandering
Reduce Inventory and Rental Costs
• Comprehensive asset utilization reports
• Par-level alerting
• Use analytics to aid in right sizing inventory
• Identify assets due for scheduled maintenance

Optimize Patient Flow and Satisfaction
• Create alerts for wait times to stay in compliance
• Streamline patient flow to help shorten lengths of stay and serve more patients
• Produce location reports of person and asset movements
• Visualize breadcrumb trails of history

Provide Infant Protection
• Seamless integration with our KinderGUARD® and KinderMATCH® systems
• Flexible, active RFID
• Real time event notifications
• Integrated video surveillance

ENVisionIT works with the Internet of Things as devices, systems and services are connected within the existing network enterprise infrastructure

ENVisionIT®
NEXT GENERATION REAL-TIME LOCATING SOLUTIONS
• Enhanced granularity allowing for accuracy to within ±1 foot without the need for hardware in each room
• Faster system implementation using state of the art predictive system design technology
• Information can be backhauled using Wired Power over Ethernet
• Locate anyone anytime anywhere

Prevent Patient Wandering
Wandering System
• Seamless integration with our Door GUARDIAN® system
• Flexible, active RFID
• Real time event notifications
• Integrated video surveillance
ENVisionIT® RTLS Solution

Scalable Solutions for Healthcare

ENVisionIT is a modular enterprise solution.

- Purchase only what you need and scale the solutions later
- Create a more efficient work place while saving your budget for higher priority or time sensitive projects
- Superior accuracy with less hardware using ultra wideband (UWB) technology

Learn more about our ENVisionIT RTLS at www.securecare.com

The mVision app by Secure Care Products allows users to receive notifications if system alarms and alerts via iOS or Android mobile devices.

Our systems can be fully integrated to provide total visibility to your facility’s operations, allowing you to manage your business and monitor key performance metrics.
