

Safety & Security

Location-Based Data Solutions (LBDS) Gives Staff and Patients Help, When they Need It.

Staff and patient badges offer automated supervision including a duress button that can instantly reach security and other personnel directly on mobile devices.

- Duress button creates immediate notification of a person in need
- Notifications include real time location of the person in need
- Breadcrumb a persons location history to view infection risks
- Give staff a greater sense of security to help improve staff turnover

Customize Rules and Events to Create Efficient Communications of Patient and Staff Needs.

- These badges can be assigned to staff members and/or patients.
- The button can send out instant duress notifications to staff and security and include the exact location of where help is needed.
- Each badge reports on all location history and can show a trail of where each person has been and how long they were in a specific location.

- Customize communication on mobile devices using the mVision mobile application.
- Determine which alarms and alerts go to which staff members to include all name and location details.
- Set escalation rules to notify certain individuals if an event is not cleared in a set period of time.
