

Infant Protection Solutions

Automatic Enrollment

When a transmitter is applied to a child, it automatically becomes active in the system offering instant protection.

Total Supervision

Transmitters are active and report in every 7 to 10 seconds.

Tamper Proof

Straps feature cutband technology that will alert staff if cut, broken or tampered with.

Baby and Child Friendly

The adjustable strap is soft and comfortable against delicate skin.

Easy-To-Use Software

Patient management simplified, see alarm/alert details, expired transmitter notifications and clear display of monitored floorplan

Reliable Security

KinderGUARD is not computer controlled or dependent, so it continues providing protection even in the event of a computer system failure or power outage.

Technical Support 24/7/365

Get support anytime from your local certified distributor and Secure Care Products' customer support line.
